Kaartik Tejwani

4088571173 | ktejwani81@ucla.edu | linkedin.com/in/kaartik-tejwani | github.com/KaartikDev

Education

University of California, Los Angeles — Los Angeles, CA
Bachelor of Science in Computer Science, 3.8 GPA — *June 2028*

Experience

Member of Technical Staff, Intern (Incoming) — January 2027 – March 2027
Abridge — *San Francisco, CA*

- Selected to build **production LLM systems** for clinical workflows.

Software Engineering Intern — June 2025 – September 2025
Arive — *San Ramon, CA*

- Built internal RAG assistant over **1,000+ documents**, enabling developers to query mortgage guidelines directly.
- Created **vector database cost model** across storage and query assumptions to estimate monthly spend.
- Evaluated **Pinecone, MongoDB, OpenSearch**, and other vector DBs for final backend selection.
- Automated cloud **vector index creation and document ingestion** pipeline for repeatable deployments.

Quantitative Developer Intern — June 2023 – August 2023
Tanius Technology — *Danville, CA*

- Built futures backtesting system processing **1B+ financial time-series data points** for HFT strategies.
- Ranked hundreds of predictive features using **regression, regularization, and cross-validation**.
- Cut parameter grid-search runtime by **10x with JIT compilation**, accelerating large parameter sweeps.
- Built **data cleaning and feature engineering** workflows to standardize noisy market data for testing.

Founder & President — September 2025 – Present
Bruin Software Engineers — *Los Angeles, CA*

- Founded a **200+ member** organization preparing students for AI-driven shifts in software engineering.
- Secured **$13,000 in sponsorships** from **Google, Jane Street**, and others to fund student programs.
- Matched **65+ students** with engineers from OpenAI, NVIDIA, and other top companies for 1:1 mentorship.

Projects

JAX Transformer Training | *JAX, Flax, Optax, TPU, Python* — July 2026

- Implemented ∼**10M-parameter Transformer** in JAX/Flax/Optax from scratch to learn addition.
- Generated synthetic **0-999 addition data** with 13-character vocabulary and fixed-length padding.
- Tuned batch size, sequence length, and model width to train quickly on free Colab **TPU**.
- Derived Chinchilla scaling laws and compared **dense vs. MoE** compute, memory, and token tradeoffs.

Accent - LA Hacks Winner (1000+ Hackers) | *HuggingFace, ElevenLabs, PyTorch, Swift* — April 2026

- Won **1st in Light the Way** and the **Figma Make Challenge** at LA Hacks 2026 among 200+ teams.
- Shipped macOS assistant mapping **voice to on-screen UI actions** for elderly and non-English users.
- Integrated ElevenLabs STT/TTS, Gemini reasoning, Swift app, and local Python services into one pipeline.
- Cut UI selection errors by **30%+** using **CV element crops** over raw screenshot prompting.

Skiing Web App | *Node.js, Express, tRPC, Redis, MongoDB, JavaScript* — May 2026

- Defined **REST and tRPC endpoints** for lift, trail, and resort status reads and updates.
- Implemented **Redis look-aside caching** to reduce repeated MongoDB reads for latest status queries.
- Wrote **MongoDB data access logic** for persistent storage of latest and timestamped status batches.
- Added **bearer-token auth and rate limiting** for protected status update endpoints.

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, Bash
Frameworks: Node.js, Express, React, REST APIs, Docker
AI/ML: JAX, Flax, Optax, PyTorch, LangChain, HuggingFace
Cloud/Data: AWS, GCP, Boto3, MongoDB, Redis
Tools: Git, Linux CLI, Codex, Claude Code
